Projects: -

AI-Based Mock Interview System
- An AI-powered interview platform built with the MERN stack and OpenAI API that simulates real interview scenarios by generating personalized questions and providing intelligent feedback. It also integrates resume analysis, authentication, and a credit-based payment system to deliver a complete SaaS-style user experience.

AI Resume Screening & candidates Shortlisting
An automated resume screening and candidate shortlisting platform. It allows recruiters to upload batches of resumes, extract core skills, evaluate ATS compatibility scores, and rank/shortlist the best candidates using an AI-powered pipeline.
- Bulk Resume Upload & Parsing
- ATS Score Compatibility Evaluation
- Interactive Recruitment Dashboard

HealFlow - AI Healthcare Chatbot
An AI-powered healthcare companion and clinic management platform. It helps users understand symptoms, explore medicine insights, schedule appointments with doctors, and delivers reassurance through an interactive, LLM-powered chatbot UI.
- AI Symptom Checker
- Real-time Doctor Appointment Booking

Professional Experience

05/2026 – 06/2026 Jamshedpur
Full Stack & AI Automation Intern
Izzki Tech Solution Pvt. Ltd.
Designed and built two production-ready AI-powered applications from scratch:
- »**AI Resume Screening & Shortlisting:** Built a bulk resume parser and ATS compatibility evaluator using a React/Express stack and n8n workflow automations to streamline recruitment.
- »**HealFlow AI Healthcare Chatbot:** Developed a patient care portal featuring an AI symptom checker chatbot, medicine database, and live doctor appointment scheduling system.
